

Clearer books. Stronger business readiness.

A South African accounting platform designed to help SMMEs manage day-to-day finances, maintain better records and build the visibility needed for compliance, growth and funding conversations.

KNOW YOUR NUMBERS

- **Automated bank reconciliation.** Match statement activity faster and keep a clearer view of the real balance.
- **Invoicing and payment tracking.** Create invoices, monitor what is outstanding and improve day-to-day debtor visibility.
- **Financial visibility.** Bring core accounting information into one place so decisions are based on current records, not last month's picture.

STAY BUSINESS-READY

- **Built for South African requirements.** Designed around local accounting, VAT and business-compliance needs.
- **Records that are easier to use.** Keep information structured so reporting, tax preparation and management reviews are less fragmented.

BUILD FUNDING READINESS

- **Turn better records into a stronger funding conversation.** Organised financial information can help a business present a clearer picture to lenders and funding partners.
- **Shareable financial information.** Organised financial information can be prepared in a clearer, more structured format for funding conversations.

BUILT FOR WHERE YOU ARE

- **Starting out.** Get the accounting basics in place early and build a stronger financial record as the business grows.
- **Growing business.** Add more financial visibility, debtor management and reporting as operational complexity increases
